#### **DETAILED ACTION**

1. This office action is a response to the amendment filed on 7/14/2003.

## Claim Objections

2. Claim 44 is objected to because of the following informalities: It is confused as to what the phrase "the plate" in line 8 is indicated. Upon further consideration, the plate in line 8 appears to be indicated the ferromagnetic plate recited in lines 1-2.

Appropriate correction is required.

### Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 4. Claim 44 is rejected under 35 U.S.C. 102(b) as being anticipated by Merlano (US PAT. 5,671,526).

Merlano teaches a method of preparing transformer core including steps of cutting a starting plate (11) having oppositely directed surfaces as shown in Fig. 16 and 17 and a thickness between such surfaces into strips (1), each strip having a width greater than the thickness of the starting plate and equal to the thickness of the core to be fabricated as shown in Fig. 1-4 and stacking the strips so that the major surfaces of

Application/Control Number: 09/852,551

Art Unit: 3729

the strips abutting one another as shown in Fig. 1 (col. 3, lines 3-18 and 61-64, col, 4, lines 60-64, and col. 5, lines 31-41).

#### Response to Arguments

5. Applicant's arguments filed 7/14/2003 have been fully considered but they are not persuasive. Applicant argues that the prior art of record fails to disclose a process of cutting a starting plate having oppositely directed surfaces and a thickness between such surfaces into strips. Examiner traverses the argument. As shown in Fig. 16 and 17 of Merlano, the starting plate has been cut into strips.

Applicant also argues that the prior art of record fails to disclose the cut strip having a width greater than the thickness of the starting plate and equal to the thickness of the (ferromagnetic) plate to be fabricated. The cut strip (1) as shown in Fig. 3 has a width (indicated as 2L) and having a thickness of the plate. According to Fig. 1 and 3, the width of the plate is greater than the thickness of the plate. Also, according to Fig. 1, the width is equal to the thickness of the stacked strips (E) to be fabricated.

#### Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

Page 4

Application/Control Number: 09/852,551

Art Unit: 3729

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Paul D Kim whose telephone number is 703-308-8356. The examiner can normally be reached on Tuesday-Friday between 7:00 AM to 5:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Peter Vo can be reached on 703-308-1789. The fax phone numbers for the organization where this application or proceeding is assigned are 703-872-9302 for regular communications and 703-872-9303 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-306-5648.
